Oil Market.

New Berroin, Friday, July 29, 1864.

Oil market very quiet. Orders to buy withdrawn, owing to depression in the gold markets. Sales past week, 170 bbis. for manufacture, and 95 bbis. for suport, at \$2 30 per gallon.

CONSUMPTION, BEONCHITIS, ASTHMA, THROAT and Nasat Diseases, treated with unexampled success after the Topical Atomic Method, discovered by Dr. STUDLEY, No. 95 Clinton-place, 8th-st., New-York.

### Business Notices.

A CARD .- Owing to the enormous advance In the prices not only of the precious metals, but of every other commodity, I find it impossible to continue longer the sale of my PENS at old rates. This I regret exceedingly, as I had hoped to continue without change, but, having to buy gold at the present febulous prices, this is no longer possible.

My friends and the public will give me credit, however, for having struggled long and hard against the universal pressure to depreciate the Government credit and currency. The ade now made is not enough to cover me, with gold at prefurther rise in prices must be made. In any case, however, I retofore, to sell a better article for less money thun it can be bought for elsewhere.

A circular, with engravings of all the sires, styles, and proout prices will be sent on receipt of letter posinge. Address

A. Monros.

that hath not ears, hear. From The Christian Times.

### SIGHT RESTORED. CONCERNING EYES AND OCULISTS.

Of the five senses, that which we call seeing is the most im portant and most valued. In proportion as this sense falls us. we are reduced to helplosmoss. If entirely destitute of sight, how slow would be our progress in knowledge, and how limited our sphere of action and usefulness. Endowed with it, the universe becomes a new creation, clothed with beauty and

turned, but not our wonted sight. What might have been the result, either of further neglect or of incompetent treatment-

we cannot say. Stating our case to a friend, he assured us that a similar one in his own family had recently been treated with entire success by Dr. Von Eisenberg of this city. Satisfying ourselves by more particular inquiries that the Doctor is no emhe piric, but a scientide oculist and surist, we concluded to seek schnowledge as very great. Though but a few weeks under his ears, the appearance of our eyes has totally changed. The popil is now full and clear, and the lide are entirely free from inflammation. The Doctor says that the optic nerve has been weakened, and the retine assumed a chronic inflammatory state, affecting more or less all the other tissues, and threaten ng, if neglected, to end in Amsurosis. Ophthalmitis, we belleve, is the term which oculists apply to eyes affected as were ours Having obtained the much desired rallef, we take great secure in schoowledging our indebtedness to the telent of Dr. Von Riccoberg, and of calling to it the attention of other who may be suffering from a similar or even worse condition of their eyes. It is said that Providence provides an antidot for every bone. It is certain that the eye is, in these time subject to severer trials than formerly. Let us be thankful, then, that so we increase the tendencies which destroy the organ of vision, the progress of science keeps pace with these

tendencies, if not in advance of them. OFFICE. No. 816 BROADWAY.

the universe becomes a new creation, clothed with beauty and diversified by that infinite variety which never fails to attract the mind and heart.

For several months past this has been a practical subject to us. An inflamed condition of the eyelids, communicating itself to the pupil, rendered the discharge of daily duties not only painful, but dangerous. Attributing it to the effect of a cold, we endured it through the Spring, with the hope that with the return of warm weather it would entirely disappear.

But in this we were doomed to disappointment. Summer returned, but not our wented sight. What might have been the
